

[These delete functions are PostgreSQL functions which are invoked by the WHFS HydroBase application.]

[deletes from many tables in appropriate order]

[This is NOT a data flow. It is a control flow, i.e., delete_location calls delete_riverstat.]

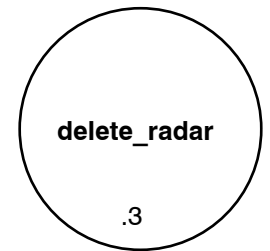

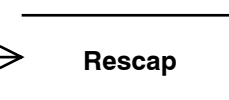

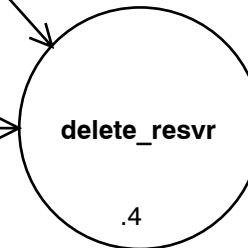

execute_delete_riverstat

[deletes from many tables in appropriate order]

[This is NOT a data flow. It is a control flow, i.e., delete_location calls delete_resvr.]

execute_delete_resvr

[deletes from many tables in appropriate order]
